Features	Benefits
<ul style="list-style-type: none"> • Sound attenuated enclosure • Deep Sea 7220 Digital Controller • 250 Gallon Base Tank • Auto Start Auto Stop • Auto Exerciser • Generic Auto Transfer switch • Accessory Panel • Batteries Included 	<ul style="list-style-type: none"> • Increased longevity • Simple system monitoring • Easy access and utility • Ease of maintenance • Generator systems protection • Keeps your generator running smoothly

Engine Specifications

Brand	Cummins
Model	KTAA38-G9A, 4-cycle
No. of Cylinders and Cycle	12 Cylinder 4 stroke
Total Displacement	38 L
Compression Ratio	14.5: 1
Rated output (KW)	1250KW
Rated Speed	1800RPM
100% Load Fuel Consumption (g/kw.h)	201 L/h
Lube oil Capacity	153 L
Cooling Method	Liquid Cooled
Starting Method	24V Electric

Alternator

Stamford model number	HCI634J
Rated Power	1000KW
Rated Voltage	400/230.
Rated Current	According to the selected voltage or Phase
Rated Frequency	60HZ
Rated Speed (RPM)	1800RPM
Power Factor	.08 lagging 3 Phase
Phase Connection	3 phase
Winding Connection	3 or 4 wire connected/ 12wire for 3phase
Excitation Method	Brushless
Voltage Regulation	AVR

Cooling System		Fuel System	
Max. coolant cycling resistance exterior engine	TBA	Fuel injection pump model	Direct Injection
Thermostat adjusting temperature	82-95 c	Max. fuel input resistance of transfer pump	TBA
Min. opening pressure of radiator cap	69 kpa	Max. overflow fuel resistance at overflow pipe or injector	TBA
Coolant capacity- engine only	30 L	Total fuel overflow amount	TBA
Exhaust System		Lubricating System	
Max. Back Pressure	10.05 KPA	Normal oil pressure range	
Electrical System		Low idle	138 KPA
Starter	24 V	Rated Speed	310- 448 KPA
Battery charging system	35 A	Max oil temperature permitted in oil pan	121 C
		Lubrication system Min. capacity	135.0 L

Generating head

- 2/3 pitch windings avoid excessive neutral currents
- Class 'H' insulation with severe environmental protection as standard
- Single or two bearing construction with dynamically balanced rotor and sealed-for-life bearings
- Easy access for installation and maintenance
- 12 wire reconnectable stator/terminal arrangement
- Built to conform with all leading industrial and marine standards
- SX460 AVR as standard with 1.5% regulation and 2 Phase Sensing
- IP23 as standard

Deep Sea 7220 Digital Controller

The DSE7220 is a control module for single gen-set applications. The module incorporates a number of advanced features to meet the most demanding on-site applications. The DSE7220 is an Auto Mains (Utility) Failure Control Module designed to start and stop diesel and gas generating sets that include electronic and non-electronic engines. The module has the capability of being able to monitor a mains (utility) supply. Modules are simple to operate and feature a user-friendly menu layout for improved clarity. Enhanced features include a real time clock for improved event and performance monitoring, the ability to display any language on screen and a 132 x 64 pixel LCD display.

This plug panel is a gives you superior utility when it comes to getting use out of your generator. Panels can include:

- 3 30 or 50 Amp twist lock or straight plug receptacles for large freezers, AC Units, and large utilities.
- 2x2 110V plugs for tools and lighting
- Lugs for hooking your generator up to utility and home.

The panels include switches to turn receptacles on and off with ease.
